

Hessian State Chancellery funds Innomatik's AI project

AI consulting firm Innomatik and software provider for Computer Aided Facility Management (CAFM) speedikon FM AG launch project “Chat4BI - Chatbot for Business Intelligence” with the support of the Hessian State Chancellery. The aim is to overcome the challenges of today’s AI chatbots by developing a chatbot that handles sensitive company data securely and can run both in the cloud and on each company’s own servers.

X

Bensheim, Germany, December 11, 2023 – Leading AI provider Innomatik announces its collaboration with speedikon FM AG. Together, the two Germany-based companies are developing the “Chat4BI – Chatbot for Business Intelligence” in a pioneering project. The project is funded by the Hessian State Chancellery under the Distr@I funding program of the Digital Hesse department. It is the first project in the Bergstrasse region that is being funded with this program.

The challenge with existing AI chatbots such as ChatGPT from OpenAI or Bard and Gemini from Google is that they require an extensive IT infrastructure due to their considerable size. In addition, the processing of sensitive internal company data is not transparent. Some companies have therefore already banned the use of such AI chatbots. The Chat4BI project aims to counteract these concerns by developing a chatbot that enables the secure and reliable processing of sensitive company data in various industries and that can be operated flexibly both in the cloud and on company-owned servers.

“Our goal is to develop a chatbot that utilizes the advantages of artificial intelligence while maintaining the highest security standards for the processing of sensitive company data. With the support of Distr@I under the Hessian State Chancellery, we are confident that the Chat4BI project will be a milestone in the development of company chatbots,” says Dr. Alexandra Merkel, CTO at Innomatik.

About Innomatik

Innomatik, headquartered in Bensheim, Germany, is a prominent company specializing in digital transformation.
